

# Immunizations for Adolescents

---

## Measure Description

Percentage of adolescents 13 years of age who had the following vaccines by their 13th birthday:

- 1 dose of meningococcal (serogroup A, C, W, or Y) between 11-13th birthday
- 1 Tdap vaccine between 10-13th birthday
- 2 or 3 HPV vaccines (depends on series) between 9-13th birthday

## Documentation Requirements

For immunization evidence obtained from the medical record, count patients where there is evidence that the antigen was rendered from one of the following:

- A note indicating the name of the specific antigen and the date of the immunization
- A certificate of immunization prepared by an authorized health care provider or agency including the specific dates and types of immunizations administered.

For the 2 dose HPV vaccine series there must be at least 146 days between the first and second dose of the HPV vaccine.

## Coding Requirements

**HPV:**

CPT: 90649, 90650, 90651

**Meningococcal:**

CPT: 90734

**Tdap:**

CPT: 90715

## Exclusions

Patients with documentation of anaphylactic reaction to vaccine or its components on or before the patient's 13th birthday, or encephalopathy due to vaccination (Tdap), as indicated by the appropriate ICD10CM Code
