

Adolescent Well Care Visits

Measure Description

Percentage of patients 12-21 years of age who had at least one comprehensive well-care visit with a PCP or an OB/GYN practitioner during the current year.

Documentation Requirements

Documentation must include a note indicating a visit with to a PCP or an OB/GYN practitioner, the date when the well-child visit occurred and evidence of all of the following:

- **A health history.** An assessment of the patient's history of disease or illness. It can include but is not limited to past illness (or lack of illness), surgery or hospitalization (or lack of surgery or hospitalization) and family health history.
- **A physical developmental history.** Assesses specific age-appropriate physical developmental milestones, which are physical skills seen in children as they grow and develop.
- **A mental developmental history.** Assesses specific age-appropriate mental developmental milestones, which are behaviors seen in children as they grow and develop.
- **A physical exam.**
- **Health education/anticipatory guidance.** Given by the health care provider to parents or guardians in anticipation of emerging issues that child and family may face.
